

BeaconCE

Designed as a comprehensive platform for the Continuing Education Industry, BeaconCE is a collection of services that provide solutions that meet your accredited bureau's requirements for CE webinar, webcast and online events. BeaconCE features include:

Verification of Participation

Many CE hosts are required to test the participation of their attendees periodically throughout the online event. BeaconCE provides a verification tool that randomly displays a notification box that requires the attendee to submit a customized code.

Post Event Survey or Evaluation

A customized survey or evaluation can be delivered to the participant following the delivery of the online or OnDemand event.

Administration of Final Exams

Following the delivery of your webinar, allow BeaconLive to administer a customized final exam to your attendees prior to granting them their CE credit. Exam questions can be standardized or appear randomly throughout the exam. On your behalf, BeaconLive will grade the exams and deliver the pass/fail/retake results to the participant, host and accredited bureau.

Certificate Delivery

Allow BeaconLive to customize and deliver the certificate to the participant, granting them CE credit. Certificates can be delivered to attendees based on a number of variables: attending the event, completing verification codes, completing evaluations or passing exams, or any combination of these options.

CE OnDemand

Each OnDemand event in your MediaHub can include a link to any combination of materials - evaluations, quizzes and certificates - embedded at the end of the recording. Participants must watch a pre-determined portion of the OnDemand event prior to a link appearing to complete an evaluation or exam.

About BeaconLive

BeaconLive partners with our customers to produce professional webinars, webcasts and online events – specializing in Continuing Education. Beyond providing state of the art technology, our dedicated events services team will facilitate every detail of your events to ensure its flawless execution. Schedule a customized demo with BeaconLive, and allow us to find a solution for your next event.
